Demand Alert	✔
Industry Comparison Reports	✔

Multiply your Power to Save Your Business more. EPP Corporate has a set of unique and curated solutions for mid to large sites who are big consumers of energy and have high-value and power-intensive equipment/assets.

Demand Cost Alert

Stop the source of unplanned costs. Be notified within the next 24 hours of any unusual usage behaviour and put a stop to the activity that could cost you more money. Through the monitoring of your interval data, we alert you within 24 hrs every time your usage and/or demand deviates from your normal usage pattern.

Power Quality Assist

Recover power-quality-related expenses. When your network provider fails to provide the required power quality resulting in premature electrical equipment malfunction, this may have a huge impact on your operations and may result to unplanned expense. With Power Quality Assist, we can conduct an expert review to analyse the power quality data received from your 6-channel meter to extract and document levels of technical proof to support power quality claims from your network provider.

Industry Comparison Report

With a report that compares your site's demand profile to other sites or similar businesses within your industry, you can see how efficiently your business uses energy. This may help you improve your strategies to lower your cost to stay and lead the competition.

Rate Watch

Buy when prices are low. The big question is when are prices low? How do you know when prices are low without going to tender. **Worry no more,** Power Choice's Rate Watch. This is a monthly simulated market price to ensure you are in a strategic position to lock in your future electricity contract rates when market prices move in your favor. You now have the secret edge to catch every market move and take advantage when the market presents an opportunity.

Quarterly Usage Reporting

Stay in the loop, keep costs in control. Get a summarised demand and usage data prepared on a quarterly report to provide you a closer look on your quarterly consumption trends that you may use to adjust activities that could lessen your annual energy expense.

Bill Validation

Stop paying more due to incorrect bills. How can you tell you are billed correctly? With an expert account manager, you can easily tell. Our experts use your warehouse data to independently calculate your costs, provide a second opinion and file disputes on your behalf. You have earned the money hard enough to lose it on incorrect bills, let us take care of this for you.

Dedicated Account Manager

Focus on your business while we do the work for you. Use your time better and focus on your business success. Remember, you are your business' expert, and your time means money. Save both time and money by using our experience to take care of your energy needs.

Data Warehouse and Management

Data is key to finding savings. We collect, store and give you access to a single-view of all your energy data to help you secure the best possible rates and spot any wastage that could drive down your consumption and expenses.

Tariff Impact Review

Plan and manage your budget better. Network charges can take up to 50% of your electricity bill so it's important to stay aware annual tariff changes and its impact on your cost.

Contract Start Up Review

Avoid the stress and risk of bill disputes. When you make changes to your supply arrangements, you may be faced with bill anomalies in your first few bills. Ensure you are accurately billed by having an expert deal with the rigorous and time-consuming reviews and checks.

Annual Review

Drive down your energy cost by seeing the big picture of your usage and demand trend across the year. Turn data into strategies to manage your usage and reduce your costs in the coming year.

Features	Description	Advantages	Benefits
